
Dolce Digestivo™ (Digestion Support Tonic)

20 patients reporting difficulties with digestion and showing abnormal levels of GGT enzyme were treated for 3 weeks with Dolce Digestivo™. After treatment, average GGT levels fell from 62 to 45. No significant GGT reduction was reported by the group treated with placebo.

Dolce Digestivo™ (Digestion Support Tonic)

	TREATMENT	CONTROL GROUP (PLACEBO)
<i>mg/100ml</i>	Gamma GT	Gamma GT
day 1	62	62
week 3	45	61

Note: Gamma GT is an enzyme found in high concentration in people affected by liver related conditions. Gamma GT value is considered normal between 1 and 59.
